## To Whom It May Concern

Alliance Pastoral Company, Establishment 600, T/A: GH Keily Meat Exporters Pty Ltd confirm that it has systems controls including a comprehensive HACCP Program that is designed to control microbiological hazards such as E.coli O157:H7 & Salmonella.

Our HACCP program has been reassessed in accordance with "Federal Register Notice 9 CFR Part 417 Docket Number 00-022N" dated 7 October 2002 - E.coli O157:H7 contamination of beef products.

Alliance Pastoral Company undertakes microbiological monitoring as part of HACCP verification and also performs end point testing of grinding cartoned beef for E.coli O157:H7. From the test results it is concluded that E.coli O157:H7 is a hazard reasonably unlikely to occur in the products shipped.

Our organisation is fully committed to Food Safety and further to the production of the highest quality, food safe product possible. This is achieved through the strict adherence to our HACCP Program and Quality Systems by committed company personnel.
